

# GhangorCloud: Industry's Best Cybersecurity and Compliance Solutions

**Located in the heart of California's Silicon Valley, ChangorCloud is a leading provider of cybersecurity solutions that defend clients against the most sophisticated attacks on their information, data repositories, and applications. For its two core product offerings, the company has been awarded Best Cybersecurity & Compliance Platform in this year's Corporate Excellence Awards.**

For companies of any size, data is truly a lifeline. In order to stay ahead of their competitors, they must effectively leverage information to gain important business and customer insights that they can use to make informed decisions. Given its essential uses, it is clear that businesses should invest in protecting their data properly.

Founded by Tarique Mustafa and Bhanu Panda, industry recognized cybersecurity experts with demonstrated abilities in the area of information security, GhangorCloud offers a wide array of best-in-class, advanced, and innovative cybersecurity solutions designed to tackle any potential cyber threat.

Primarily, GhangorCloud offers an excellent 4th generation Data Leak and Exfiltration Prevention (DLEP) platform, which is the industry's first and only of its kind. This pioneering solution, named Information Security Enforcer (ISE), provides data security against malicious external and internal attacks, protecting mission critical and confidential data from unauthorised access, disclosure, or theft.

Today, ISE is the only 4th Generation DLEP solution to effectively address the prevalent issues of data leaks and theft. For this reason, it has come to be known as the industry "Gold Standard" of cybersecurity solutions.

Many of GhangorCloud's customers have previously invested in the use of traditional 3rd generation DLEP platforms, only to be disappointed with their experience. Often, this is what drives them to instead adopt the use of GhangorCloud's 4th generation solutions. The firm is proud to have seen an increase in the number of large customers who are making this switch.

A second product offered by GhangorCloud is its information security and compliance solution, named Compliance and Privacy Enforcer (CAPE). This full stack Privacy Compliance Enforcement Platform automates all the tasks required to comply with data privacy mandates such as CCPA, GDPR, and more.

Alongside these core offerings, GhangorCloud has also created a number of other breakthrough technologies, which have completely redefined cybersecurity and what it entails to build a credible defence against data exfiltration and theft.

With its excellent solutions, GhangorCloud serves businesses that have important confidential data to protect. Therefore, its client base is diverse, encompassing organisations within the Fortune-100 as well as medium sized enterprises. Operating across a multitude of vertical markets, its clients include financial institutions, banks, hi-tech organisations, pharmaceutical companies, smart cities, national security agencies, and government ministries.

Having achieved significant growth since its foundation in 2014, GhangorCloud owes its success to its outstanding team of cybersecurity experts. The firm hires highly experienced, knowledgeable, and motivated team members with a track record of delivering successful

products and services. With their unique capabilities, each employee plays an integral role in contributing towards the success of GhangorCloud. It is through their teamwork and collaboration that the company has been able to drive its products to lead the market.

For its exceptional solutions, GhangorCloud has been awarded Best Cybersecurity & Compliance Platform in the Corporate Excellence Awards 2023. Impressively, this is not the first time that the company has earned a title in this awards programme. Previously, it has been awarded Most Outstanding Software in Cyber Security Solutions 2022 and, before that, Best Platform for Cyber Security 2021. This speaks volumes about the company's continued excellence.

Moving forwards, GhangorCloud has plans in place to ensure its development, growth, and success throughout the rest of 2023 and beyond. The firm is proud to have exceeded its targets in 2022 and expects that it will continue to do so in the coming years.

We are thrilled to extend our sincere congratulations to Tarique Mustafa, Bhanu Panda, and their team on their continued success in our Corporate Excellence Awards programme. We look forward to seeing what the firm will go on to achieve in the future.
